PROFESSIONAL SUMMARY

Senior full-stack engineer with **9+ years** building multi-tenant SaaS, distributed systems, data pipelines, and AI products end to end. At Luzmo, reduced GPT-4 workflow latency **40%**, cut monorepo build time **60%**, and raised test coverage from **65% to 92%**. Strong in TypeScript, Node.js, React, Angular, Python, PostgreSQL, and REST/GraphQL APIs. **Founder of ShipGuarde**, a multi-agent release-quality platform. Remote since 2018; fluent in English; mentors engineers and owns ambiguous projects end to end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Angular, Next.js, NgRx, Redux, RxJS, Tailwind CSS, Responsive UI, Accessibility

Backend & APIs: Node.js, Express, NestJS, FastAPI, REST APIs, GraphQL, tRPC, WebSockets, Microservices

Data & AI: PostgreSQL, MongoDB, Redis, BigQuery, Snowflake, pgvector, RAG, LangChain, LangSmith, OpenAI GPT-4/4o, LLM Evaluation

Cloud & Quality: AWS, Docker, CI/CD, GitHub Actions, Jest, Cypress, Playwright, NX Monorepo, Observability

PROFESSIONAL EXPERIENCE

Full Stack Developer

June 2019 - Present

Luzmo (Formerly Cumul.io)

Remote

TypeScript, Angular, React, Node.js, Python, REST/GraphQL APIs, PostgreSQL, MongoDB, Redis, OpenAI GPT-4, LangChain, NX, Docker, AWS

- Owned analytics features across Angular/React frontends, Node.js/Python services, REST/GraphQL APIs, and data pipelines; partnered with Product and Design and mentored **5+ engineers**.
- Architected a GPT-4 analytics assistant that turns questions into interactive charts; cut latency **40%** with tiktoken, Redis, query optimization, and LangChain observability while protecting tenant data.
- Led system design for an NX micro-frontend migration, cutting build time **60%** and improving developer velocity for a platform serving thousands of embedded analytics requests daily.
- Raised automated test coverage from **65% to 92%** with Jest, Cypress, and Playwright; strengthened CI/CD and reduced production regressions.

Backend Developer

January 2018 - June 2019

Luzmo (Formerly Cumul.io)

Remote

Node.js, Express, TypeScript, REST APIs, Microservices, MongoDB, PostgreSQL, Docker, GitHub Actions, AWS Lambda

- Built scalable REST APIs and Node.js microservices processing thousands of requests daily with **99.9% uptime**, supporting rapid product growth and feature delivery.
- Engineered data pipelines and connectors for **5+ external platforms**, including BigQuery, Snowflake, and PostgreSQL, enabling real-time analytics for thousands of customers.

Software Engineer

September 2016 - September 2017

Persistent Systems Ltd.

Nagpur, India

Python, Django, OCR, Tesseract, Java, Windows/.NET

- Delivered secure applications for government clients and helped design an OCR translation pipeline using Tesseract that eliminated data errors across thousands of documents each month.
- Built a cross-platform deployment tool that reduced enterprise installation time from days to minutes and saved **120+ IT staff hours** per deployment cycle.

PROJECTS

ShipGuard: AI Quality Gate for Every Release (Founder)

Node.js, Fastify, TypeScript, BullMQ, Redis, PostgreSQL (Prisma), Zod, WebSockets, Python, Playwright, Docker, Next.js

- Founded and architected a multi-agent release-quality platform for visual QA, accessibility, performance, security, and linting across live URLs and pull requests; converts parallel findings into one plain-English Ship / Do-not-ship verdict.
- Built distributed, event-driven Fastify/BullMQ orchestration with isolated workers, timeouts, retries, WebSocket progress, typed Zod contracts, and multi-tenant PostgreSQL; added precision/recall/F1 evaluations to prevent agent-quality regressions.

NexDocs - AI Knowledge Platform (RAG & Vector Search)

Next.js, TypeScript, tRPC, NestJS, Python, FastAPI, PostgreSQL (pgvector), LangChain, OpenAI GPT-4o, Redis, Docker

- Architected a Next.js/NestJS/FastAPI microservices platform with tRPC type safety across **40+ API endpoints** and document ingestion for PDF, DOCX, Markdown, and URLs.
- Built a pgvector RAG pipeline with smart chunking, semantic retrieval, SSE/Redis progress streaming, and five parallel generation workers, reducing content generation time **70%**; added circuit breakers, retries, caching, and LangSmith tracing.

Railway Control Center - Service Scheduler (Full-Stack, React + Next.js)

Next.js 14, TypeScript, TanStack Query, Tailwind, shadcn/ui, NestJS, Prisma, PostgreSQL, GraphQL

- Built a full-stack scheduler on Railway's GraphQL API with secure token storage, cron-based jobs, real-time status polling, one-click actions, and a unified health dashboard; deployed with Docker on Railway.

Ocularis - Autonomous Agent (Open Source)

Python, FastAPI, Playwright, PostgreSQL, pgvector, Next.js, Docker

- Built a vision-based browsing agent with goal planning, critic loops, outcome evaluation, MD5/SSIM stuck detection, multi-step recovery, and circuit-breaker escalation to human intervention.

EDUCATION

Bachelor of Engineering, Information Technology

Graduated 2016

L.N.C.T, Bhopal
